SUMMARY

Platform Engineer specializing in **multi-tenant distributed systems, cloud-native infrastructure, and backend platform design**. Scaled Starbucks' core platform to handle 60% of mobile transactions, enabling seamless microservices deployment for 40+ engineering teams. Advanced expertise in Kubernetes, Golang, AWS, and automation tooling. Proven ability to architect robust, high-availability systems for global-scale platforms.

TECHNICAL SKILLS

Languages: Golang, Java, Python, JavaScript (Node.js, React), C++

Cloud/Infra: AWS, Kubernetes, Docker, Terraform, ArgoCD, GitHub Actions

Systems: Distributed Systems, WebSockets, Nginx, Multi-Tenant Architectures

Databases: MongoDB, MySQL

PROFESSIONAL EXPERIENCE

Starbucks Technology – Platform Engineer

May 2022 – Present

- Engineered and maintained the **multi-tenant platform infrastructure** powering ~60% of Starbucks mobile transactions, supporting 40+ engineering teams globally.
- Designed and implemented Kubernetes controllers in **Golang**, automating resource scaling, service discovery (Ingress, DNS), and lifecycle management for internal services.
- Delivered **self-service automation tools** enabling engineering teams to securely deploy and manage microservices, improving deployment velocity and reducing operational toil by 30%.
- Enhanced system observability with **tenant-aware monitoring and logging**, cutting mean time to resolution (MTTR) by 25% and optimizing platform costs.
- Refactored legacy platform components for better efficiency and scalability, reducing operational overhead for internal tenants.

Credit Rent Boost – Software Engineer Intern

Nov 2021 – Feb 2022

- Developed C#/.NET MVC web applications for financial services, implementing secure backend integrations and responsive UI components.
- Built and optimized front-end & back-end workflows using JavaScript, HTML, and CSS.

PROJECTS

Debate App – Real-Time WebSocket Platform (Go, MongoDB, React)

2024 – Present

- Built a WebSocket backend enabling low-latency, real-time structured debates with React-powered dynamic frontend UI.
- Deployed backend (Railway) and frontend (Vercel) for high availability and scalability.

Instant Expert™ – AI Skill Battle Platform (Golang, Next.js, Supabase)

2025 – Present

- Designed and developed a real-time AI-powered platform for skill challenges, integrating WebSockets for multiplayer interactions and OpenAI GPT for dynamic content generation.
- Built backend services in Go with Supabase for authentication and session management; deployed frontend globally with Vercel.

EDUCATION

B.S. Computer Science (Software Engineering) | Arizona State University

May 2023 | GPA: 3.03

ADDITIONAL EXPERIENCE

DMD Systems – Tech Auditor (2018 – 2022)

Audited enterprise hardware for secure data erasure and compliance.

VIAIR Corp – Warehouse Tech Lead (2017 – 2018)

Led quality control and optimized processes for returned product workflows.
